CONGRATULATORY ADDRESS

by

Assoc. Prof. Dr Silviya Aleksandrova-Yankulovska, MD, PhD, MAS

Dean, Faculty of Public Health

Medical University of Pleven, Bulgaria

**8th International Workshop on
Biological Effects of Electromagnetic Fields
Varna, Bulgaria
21st – 26th September 2014**

**HONOURABLE MEMBERS OF THE ORGANIZING COMMITTEE,
DISTINGUISHED SCHOLARS,
HONOURABLE GUESTS,**

On behalf of Faculty of Public Health of Medical University of Pleven, I sincerely welcome everyone to this opening ceremony prepared to honour you, who have travelled from all over the world to participate in this memorable event.

With the dawning of the 21st century, we realize that technological developments have brought about enormous benefits to humanity but they have also affected our environment and inevitably – our health. Witnessing a severe economic crisis worldwide we are aware of the limited work possibilities and the importance of the working conditions is greater than ever before. Creating better opportunities for exchange of scientific wisdom is an inseparable part of our joined efforts towards achievement of healthier working and living environment. Collaboration between European countries and unification around shared EU values will guarantee success in the achievement of your goals towards creation of effective EMF policies.

I wish you fruitful work and pleasant stay at the Bulgarian seaside!
